PROJECTS

GCUF Web Ecosystem, *Full Stack Developer* - NextJS| Appwrite Cloud

[GitHub](#) | [Website](#)

- Built a web ecosystem comprising an Admin Portal (web app) and Public Website using Next.js and Appwrite Cloud.
- Developed scalable backend solutions for user authentication, data management, and system operations.
- Ensured seamless cross-platform compatibility with responsive design and optimized performance.

Student Portal, *Full Stack Developer* - React Native | Appwrite Cloud

[GitHub](#)

- Developed a mobile application for students using React Native, integrated with Appwrite Cloud for backend services.
- Implemented features like user authentication, academic information access, and notifications.
- Optimized performance and ensured a smooth user experience across both iOS and Android platforms.

Power Bridge Website, *Full Stack Developer* - NextJS

[Website](#)

- Developed a dynamic and responsive website for Power Bridge using Next.js, focusing on user-friendly design and performance optimization.
- Integrated essential features such as project portfolios, services overview, and contact forms with a seamless user experience.
- Ensured the website's scalability and future-proofed it for easy updates and maintenance.

BloomTech Sprint 15, *Full Stack Developer* - React | Node | Express

[GitHub](#)

- Built a CRUD application using React for the frontend and Node.js with Express for the backend.
- Implemented features like user authentication, data management, and RESTful API integration for seamless communication between the client and server.
- Focused on optimizing code structure, performance, and ensuring scalability for future enhancements.

EXPERIENCE

Power Bridge (PVT) Ltd, Remote - Technical Support/Web Developer 2022- present

- Provided technical support for web-based solutions, ensuring smooth operation and addressing user issues promptly.
- Designed and developed the company's website, showcasing project portfolios, services, and contact forms using modern web technologies.
- Collaborated with cross-functional teams to maintain system updates, troubleshoot issues, and implement enhancements.

Freelance, Remote, Pak - Software Developer 2021 - present

- Developed and delivered custom software solutions for clients using JavaScript, NodeJS, and SQL.
- Built responsive web applications, RESTful APIs, and automation scripts tailored to client requirements.
- Ensured high-quality code, debugging, and timely delivery of projects while maintaining effective client communication.
